

## **KINTA**

### **Breeding Project**

#### **NEEDS:**

The project is part of a macro-project for the self-sustenance of the agricultural center of Kinta, which today represents an important work and livelihood opportunity for the local population and the neighboring ones. The ultimate goal is to ensure both the 700 children of Pediatrics Kimbondo and both the population of Plateau du Bateke and to have complete nutrition for the duration of the year. This activity will also enable a system of job placement for older kids hosted at Kimbondo who will have, after their studies, a future career that will go from production to processing to managing and organizing the agricultural center.

#### **CONTEXT:**

Agriculture, including forestry, breeding and fishing, is the main sector of the economy of the DRC. It contributes 40% to GDP and employs about 75% of the labor force and has a great potential for development. The main crops are cocoa, coffee, cotton, palm oil, tea, rubber, sugar and cinchona bark, while the main food products consist of corn, rice, potatoes and cashews. Very little emphasis has instead livestock breeding (the Republic of Congo is forced to import meat and dairy products), although there has been attempts to introduce breeds resistant to trypanosomiasis. Despite the creation by the government of special institutions also fishing fails to make a significant contribution for the feeding of the population, which still lives in uncomfortable food conditions.

#### **GENERAL OBJECTIVE:**

The project aims to contribute to the present and future sustenance of the Pediatrics of Kimbondo and of the population of Kinta through the development of the human and natural resources, guaranteeing the improvement of health and alimentation.

#### **SPECIFIC OBJECTIVES:**

1. Achieving structural improvements of the fences according to the safety of the animals from theft and wild animals.
2. Purchase of the animals necessary to the creation of a production cycle of breeding.
3. Creation of new employment opportunities in agriculture for older kids from Pediatrics Kimbondo.

**BUDGET:**

Cows breeding: 12.000 €

Pigs breeding: 10.000 €

Sheep breeding: 5.000 €

Tractor's shredder: 4.500 €
