

HEALTH

Maternity and Surgery Pavilion

NEEDS:

To offer to the people a health service with the most comprehensive coverage of areas where improvements can reduce mortality in particular in case of problems during childbirth, it is being built the new pavilion on a new ground. What is still missing is the funding to ensure that the structure start (start-up funds) as well as support to the doctors present.

CONTEXT:

The health situation of the town of Mont 'Ngafula is characterized by a series of problems that make services and quality of health care unable to meet all the needs of the population. Access to health is low because of the financial indefensibility of the population and also because of the accessibility of the population to essential medicines is low. Funding of the State and the provinces to the health sector are scarce, staff training and inadequate management of health information is not orderly and steady.

GENERAL OBJECTIVE:

Starting the pavilion and contribution to the maintenance of health activities by supporting the doctors present.

SPECIFIC OBJECTIVES:

1. Ensuring a surgery service with specialized personnel, with suitable infrastructure and quality material.
2. Starting the new pavilion of surgery.
3. Creation of new employment opportunities in the health field in the reference area.
4. Speed up the process that will see the Pediatric Foundation of Kimbondo become a general hospital with consequent possibility of access to government funds.

BUDGET:

To support the 6 doctors: 7.200 € year / doctor

To support the 50 nurses present: 3.000 € year / nurse

You can support a project by making a donation to one of the associations members of Hub For Kimbondo specifying the project name
